

Where operational
excellence meets
digital transformation
in drug safety

An Ergomed company

PRUDENTIA
GROUP

A PrimeVigilance company

Bridging PV Strategy, Technology, and Execution

The integration of PrimeVigilance's global PV expertise with Prudentia Group's safety systems and technology leadership creates a next-generation safety partner—equipped to support end-to-end pharmacovigilance and modern safety database transformations with precision, compliance, and speed. We implement and upgrade safety databases, provide managed services to maintain them, and offer turnkey applications bridging gaps in leading safety databases to enhance patient safety.

Next-Generation Safety Partner

Combines PrimeVigilance's deep pharmacovigilance expertise with advanced PV technology and consulting capabilities.

Delivers integrated safety, compliance, and system transformation support.

What This Means for You

Optimized operations across all safety functions.

Guidance to select and implement the right safety solutions at every stage of drug development.

Connecting Clients with the Right Safety Solutions

This strategic move combines PrimeVigilance's deep domain expertise with Prudentia Group's renowned capabilities in PV technology, process, and management consulting—establishing a next-generation safety partner equipped to support integrated safety, compliance, and system transformations.

Together, we optimize operations and guide clients with the right safety solutions for every stage of drug development.

Strategy-to-Execution Safety Partner

From early development through post-marketing, we provide strategic and operational pharmacovigilance services under one roof—ensuring consistency, speed, and accountability.

Our experts support PV system design and implementation, risk management planning, and system setup; guide and deliver safety migrations, global ICSR management including AI-enabled intake, aggregate reporting, signal detection and QPPV services. With integrated consulting and execution, we eliminate fragmentation and delays across every stage of the product lifecycle.

Our Capabilities at a Glance

AREA	COMBINED VALUE
PV Operations	2,300+ global PV experts, 4,500+ products managed
Systems Integration	30+ system experts, certified Veeva partner
Technology & AI	Tools like MedCodr, NEOS, PVTrend, ASaPPV
Global Presence	Coverage across 100+ countries
Compliance Strength	99-100% KPI performance on global submissions

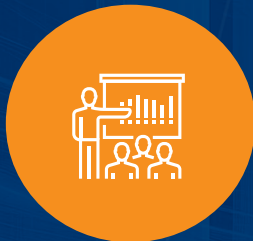

What sets us apart is our ability to seamlessly integrate operational pharmacovigilance and safety technology—without handoffs.

Veeva Vault Safety Expertise

PrimeVigilance brings certified expertise and hands-on experience to every stage of Veeva Vault Safety. From configuration and migration to integration and long-term optimization, our specialists ensure seamless, compliant, and efficient safety operations tailored to your needs.

Platform Configuration

Platform Configuration Track certified
Vault Safety specialists

30+ Implementation Specialists

Direct Veeva implementation and
post-launch experience across teams

Multi-Environment Expertise

Proficiency in both single-tenant
and multi-tenant Vault environments

Advanced Integration Tools

MedCodr and other integrated
solutions for automated, high-quality
clinical data coding

End-to-End Support

Complete lifecycle management
from strategic planning and
configuration to validation, go-live,
training, and long-term optimization

A Single Partner for Both Strategy and Execution

End-to-End Pharmacovigilance Services

- Global ICSR management (clinical + post-marketing)
- Full case processing, literature monitoring, signal detection
- Medical review and aggregate report writing
- QPPV & LCPV global network
- Regulatory intelligence across 100+ countries
- Seamless safety system operations (ARGUS, Veeva, LSMV)

Technology Consulting & Managed Services

- Safety database selection, validation & migration (ARGUS, Veeva, LSMV)
- Veeva Vault Safety implementation support (certified partner)
- Post-go-live support & system enhancements
- Managed safety database operations (E2B, intake, reconciliation)
- Automation tools: MedCodr for coding, NEOS for intake, PVTrend for QC/BI
- Capabilities in PV technology, process, and management consulting

What Makes PrimeVigilance Unique?

Leveraging nearly 20 years of specialized pharmacovigilance experience, PrimeVigilance combines deep intelligence with Prudentia Group's SMEs to provide comprehensive consulting and leadership throughout integration and centralization journeys.

Through our dedicated PVConsult and PVIntegrate divisions, we support clients fully during critical transition periods, helping build their in-house capabilities, offloading key activities, and continuing with ongoing supportive services and consultancy beyond that timeframe. This approach ensures a smooth transformation with sustained operational excellence.

**Nearly 20 years of proven PV expertise—
empowering clients with consulting, integration,
and operational excellence.**

Ready to bridge strategy and technology in pharmacovigilance?

Contact us to discover how our integrated solutions can power smarter, faster, and compliant safety operations.
