

From Global Coverage to Local Impact

PrimeVigilance's PV Network redefines local pharmacovigilance—evolving it from fragmented local support into a centrally governed, globally aligned ecosystem.

Through embedded regional expertise and unified oversight, we help clients maintain compliance, credibility, and control across every market—transforming local presence into strategic value.

Unique Benefits

- 1 Managed global coverage with local intelligence**
Locally embedded PV professionals operating within a unified, centrally governed framework—ensuring consistent regulatory compliance across more than 160 countries.
- 2 15+ years navigating complex regulatory environments**
Deep, real-world experience across diverse markets, product types, and regulatory systems—enabling faster, more confident local execution.
- 3 Proven, scalable inspection readiness**
Extensive inspection and audit experience supported by standardized processes, escalation pathways, and authority-ready documentation.
- 4 Seamless PV system set-up and oversight**
End-to-end support for local PV system establishment and maintenance, delivered through governed processes with minimal client burden.
- 5 Global local literature screening at scale**
Access to the world's largest repository of non-indexed local sources, maintained and expanded through structured regional coordination—providing deep, reliable therapeutic coverage worldwide.

Tailored Solutions for Your Unique Needs

Flexible Service Models: Designed to fit your organization

Recognizing that one size does not fit all, PrimeVigilance adapts its local pharmacovigilance support to each client's structure and needs - whether working alongside established local affiliates or acting as the primary regional PV partner where external support is required.

Essential Local Oversight

- Regulatory representation
- Compliance assurance
- Inspection readiness

Enhanced Local Partnership

- Deeper affiliate collaboration
- Regulatory intelligence sharing
- Proactive risk management.

Demonstrating Operational Excellence and Compliance Readiness

Our model combines global strength with local intelligence and regional leadership to elevate the delivery of pharmacovigilance worldwide.

Rapid response under pressure

Swift escalation, decisive action, and hands-on local support ensure continuity even in unexpected or time-critical situations.

Trusted local authority relationships

Established engagement with national competent authorities (NCAs) supports constructive dialogue, smooth inspections, and efficient issue resolution during regulatory challenges.

Agile, collaborative delivery

Seamless coordination between local PV leads, regional leadership, and global teams enables fast, compliant solutions across markets.

Ownership and proactive problem-solving

Local teams take initiative—anticipating risk, addressing gaps early, and preventing escalation before issues become critical.

Continuous improvement at scale

Lessons learned from each engagement are captured and shared across the network, strengthening standards, consistency, and future readiness globally.

Why Choose PrimeVigilance?

With over 15 years of experience supporting pharmaceutical and biotech companies of all sizes, PrimeVigilance delivers one of the most mature and widely governed local pharmacovigilance models in the market.

Our PV Network combines long-standing expertise with a purposefully expanded regional operating structure—designed to deliver inspection readiness, regulatory credibility, and operational resilience at scale.

- 1 Real-world regulatory intelligence**
A comprehensive repository of country-specific PV system requirements, timelines, and authority expectations—supporting realistic planning and compliant execution.
- 2 Largest repository of local sources**
The industry's most extensive collection of non-indexed local literature sources, enabling deep therapeutic coverage across more than 160 countries.
- 3 Inspection-ready by design**
Audit-ready systems, documented oversight, and experienced local representation—supporting inspections, audits, and authority interactions worldwide.
